Case Study Outline

Working Title: ________________________________________________________________

Abstract (150 – 250 words)

- What is your case/ project? ______________________________________________________
  - Questions about case study? ____________________________________________________
  - Hypothesis ________________________________________________________________
  - Validation of Hypothesis ______________________________________________________
  - Important Findings (results, data analysis, conclusions) ____________________________

Introduction

- Why this case study? ____________________________________________________________
  - What interested you about it/ Why is it important? ________________________________
  - What is the problem? ________________________________________________________
Method

- What was the attempted solution to the problem?

  - (Repeatable) Step-by-Step Instructions

Results

- Findings

  - Data/Results

Discussion/Analysis

- Your interpretation of the results

  - Connection to hypothesis and methods

Conclusions

- What has this case study proved (Was hypothesis proven)?

  - What have you learned from this case study?

  - Looking back, what improvements would you have made in methods?/Explanations for case study anomalies?
